

Good Morning Year 6,

I hope you are all safe, well and had a lovely weekend celebrating VE Day. It's been lovely to see all of the work you have been completing, especially all of the fantastic decorations you made to mark such a special day. I hope you enjoyed the activities that were set last week; we certainly had fun learning all about VE Day.

I've loved all the photos you've sent to school including all the posters you've made and the beautiful bunting you've created. I'm sure all your houses looked beautiful with the fantastic artwork you produced.

It's also been great to see all of the baking you have been doing. Wow, not only do we have some amazing artists, writers and mathematicians in Year 6 but aspiring chefs as well 😊 Mr Peniket and I are extremely impressed! I have to say you all inspired Belle and George and they made some delicious bread and scones for our picnic on Friday. We had a street party and sat in front of our house having afternoon tea. It really was great fun and wonderful to see all our neighbours 😊

The work I've set for you this week is slightly different from previous weeks. In Maths I have selected questions to accompany the White Rose Home Learning from Summer, Week 2. Use RUCSAC to help you with the problem solving. Some of the problem solving questions involve multi-steps, so take your time and do what you are able. Don't worry if you can't complete them all; just try your best as you always do!

This week it is National Numeracy Day and to mark the occasion I have added some fun maths activities at the end of your maths power point. Do as much or as little as you like!
