

In today' lesson you will be creating your own woolly mammoth out of a milk bottle. Don't worry, it won't be life size like the one in the story. Read through the slides and complete the activity as you go ☺ Enjoy!

# How to Make a Model Woolly Mammoth

## You will need

Plastic milk bottle (2 litre size, emptied and cleaned)  
Scissors  
PVA glue  
Brown tissue paper  
Brown card  
White pipe cleaner  
Googly eyes

## What to do

1. Cut the top half of the milk bottle, just below the handle, and throw away the bottom half. Be careful to leave on the handle, as this will become the trunk.
2. Cut an arch into each of the bottom two sides to form the shapes of the legs (see fig 1.).
3. Cover it all over with PVA glue and brown tissue paper. You can leave some bits of tissue paper sticking out to make a woolly effect. You may wish to stick on extra pieces of brown paper with frayed edges to look like hair.
4. Cut some ears out of brown card and stick them on.
5. Add some googly eyes and some pipe cleaner tusks.

Fig. 1

**Ask an adult to help you to cut the milk bottle.**

Please don't worry if you don't have brown paint or tissue paper. You could use whatever you have available in your house instead 😊

- Brown paper
- Newspaper
- Felt tip pen
- Any scraps of material you have in your house

*It doesn't need to look exactly like the picture 😊*

I would love to see your woolly mammoths😊.  
Please send them into

*Don't send them in if they are life size though!*
